2:30–2:45 PM	Break
2:45–3:15 PM	Do I really have to follow the rules? Shawn Anderson, GIS Director Tipton County GIS
3:15–3:45 PM	Building dashboards and data analytics using AI with GISCloud. Chad Howard, IT Manager / GIS Analyst Henry County 911 ECD
3:45 PM	Goodbye & Door Prizes

TNGIC FALL FORUM SPONSORS

Esri is the global market leader in geographic information systems (GIS) and since 1969 has supported organizations with the most powerful mapping and spatial analytics technology available. Governments at all levels have trusted Esri to make their communities smarter, safer, healthier, sustainable, livable and more prosperous. Visit us at: esri.com/government

For over 30 years, **Vexcel** has been the industry leader in the photogrammetric and remote sensing space, providing a comprehensive library of cloud-based geospatial data. Vexcel's unique technology stack results in unrivaled image quality, helping customers streamline remote assessment with confidence. Vexcel captures urban and rural areas across the U.S.

Driven to create a more interconnected, livable world, **KCI Technologies, Inc.**'s team of technologists and consultants apply knowledge, determination, skill and innovation for the resilience, growth and success of our clients and communities. Our staff of professionals provide a broad spectrum of technical services including business advisory, data & analytics, solutions engineering, and asset management and land management consulting and solutions. Supporting clients across all industries, we drive innovation each day, optimize operations, and incubate new ideas for a better tomorrow.

True North Geographic Technologies is an award-winning GIS services firm in Murfreesboro, Tennessee, serving federal, state and local governments, utilities, and private sector organizations. True North is focused on creating solutions that help our customers leverage the Esri platform to meet their current and future business needs. True North delivers successful projects by utilizing our highly skilled staff and over 100 years of collective technical experience with the Esri platform. We excel in working with local GIS staff to maximize the existing hardware, software, and financial resources that are available while providing guidance and strategies to grow the local GIS programs through budget and new technology planning. We also provide the skills and expertise to integrate other enterprise data systems with GIS.

Woolpert is the premier geospatial firm in the U.S. with an unmatched reputation for performance, quality, and service. We offer an integrated suite of geospatial services including photogrammetry, remote sensing, mobile mapping, digital and oblique aerial imagery, aerial and ground-based lidar, UAS, surveying, payload integration and testing, and GIS consulting/application development.

LDA Engineering provides comprehensive GIS and geospatial data services that support planning, design, and asset management for complex infrastructure projects. Our team utilizes advanced data collection technologies, including UAV (drone) aerial photogrammetry equipped with high-resolution cameras and LiDAR sensors, to capture precise terrain, infrastructure, and environmental data. This information supports accurate mapping, surveying, 3D modeling, and site analysis, giving clients a clear and reliable understanding of project conditions. LDA also employs specialized field data collection tools to efficiently gather geospatial information for applications such as ADA compliance assessments and fiber network documentation. By combining advanced technology with practical field expertise, LDA delivers accurate, high-quality geospatial data that supports informed decision-making and successful project outcomes.

LJA Engineering is an employee-owned, full-service, comprehensive multi-disciplinary consulting firm. With offices across the nation, we offer one-source, one-stop reliability for all of our clients, when and where they need us. We are organized around eight comprehensive sectors and can seamlessly build successful project teams with civil, structural, and electrical engineers, plus hydrologists, planners, landscape architects, construction managers, GIS designers, and surveyors. Our resources are leveraged across the firm to deliver expertise-driven teams, increase responsiveness to your specific needs, and individualize project solutions. <https://www.lja.com/>
